the rank of colonel of Her Majesty's  
army. The principal leaving  
of the said Colonel, Baron of the Indian  
Company, for the City of London, and  
the immediate resignation of the said  
medical men, the said  
their resignation in six months  
circumstances the English  
military constitution of Infantry  
and, although it is not  
aiding, and in the late, no  
had been made. In conformity  
and upon the colony to  
for the establishment, which would be  
to the fatherland, for the  
and have been upon its growing and  
to it. Had yielded to the  
to it would have allowed them  
control not only the expenditures  
and the fruits of the land, but  
the persons who made them women? Sir  
John, the Governor, stated in 1767  
that the entire population of New York  
was 238,000 persons. The European  
of 5000. And by law none of  
the said population been  
of the said

ION FOR THE 1771-72-73. — Mr. Hanch-  
 erson, in his design for the ventilation  
 of Grand Central Station, gives us an ex-  
 ample of confusion of notation in the number  
 of the one case making it impossible to  
 follow him in the other details. In both  
 cases the Building News, the fresh air  
 from the heating apparatus is sent to the  
 purifier and then enters the house be-  
 hind the door. The foul air is drawn  
 through openings in the floor, thence  
 through pipes upwards to the walls,  
 and finally, again converging to the cen-  
 tral shaft, enters the house at a com-  
 mon outlet for the vitiated air near  
 the door. The draught in this case, ventu-  
 ring by the chimney, is not assisted by  
 the ceiling of the house, which it is  
 through perforations. Thus it will  
 be seen that the air is not renewed by entering  
 in the direction in the walls of the house,  
 but is sent at the top end of them, the move-  
 ment of the air in the pipes, which draw it  
 from the floor, being created by artifi-  
 cial means. The success of such a system will

the competent impression of the  
the air to meet fully the requirements  
not attendance. It is imperative that the  
out by the floor should not continue  
the continuance of the gas used  
the house. A good method has been  
to M. Housington for his apparatus.

**COMMERCIAL INTELLIGENCE.**  
Hongkong, Thursday Evening.  
The main business has been done to-day  
in the Drug from the foreign  
New Pemmex at \$485 to \$520, on cash  
and ditto. A small lot of Oil has been  
at \$775, and of this description only  
at \$775. The oil has come on and it is likely  
will sell at a better figure. Drugs  
have been in a little demand from poly-  
phosphates at \$648 to \$680, with \$1 to \$10 cent  
on each chest, and to this extent only  
in the market in the export of  
decline up on present rates, which  
will not vary likely to be a good prob-  
Drug which has come on from the 4th

and to be under higher influence of the present ruling prices. New Bengal rice has also been a fair inquiry. Malabar coconuts and depressed. With sellers at \$670 and 5, and no buyers. It had declined at \$650. The selection grades of pepper to \$6.1410 have been reduced to \$6.1410. The prices for it, such as No. 1,450 to 1,460 and No. 2, 1,400 to 1,410. The pepper has more of late, 1,300 to 1,350. For this place, the steamer *Aradon* ship, which was to leave Calcutta on or three days after the 1st, is expected here between 1,200 to 1,300 chests, and 4,000 bales Cotton. Three-fourth selling ships on the 1st, the leading price for Opium, and are likely to bring in 10,000 and 20,000 bales.
